BAL KRISHNA THAPA

Espoo, Uusimaa 02630 | +358 442 427 363 | Info.balthapa@gmail.com

SUMMARY

I am a self-driven and proactive Full-stack software developer with experience of developing many full-stack applications while studying, in internship and in my pet-projects. I am eager to learn and have good understanding capability and problem-solving capacity, making me fit for an associate candidate.

EXPERIENCE

01/2023 to 05/2024

School Projects
Business College Helsinki - Helsinki, Finland
- Led a four-member team in developing a full-stack application.
- Applied React for front end and utilised PHP along with Symfony for back end.
- Utilised advanced technologies like Next.js, TypeScript, and Drupal to create a realistic prototype for partner company Wunder.
- Served as rolling team leader and contributed to frontend and backend development.
- Regularly leveraged skills in Next.js and TypeScript for project advancements.
- Gained proficiency in managing repositories on GitHub.

01/2024 to 05/2024

Software Developer Intern
Tutors Finland Oy
- Maintained ongoing projects during software development internship
- Learned project management and group collaboration techniques
- Gained in-depth expertise in various coding languages, including TypeScript and JavaScript.
- Assisted in programme development through planning, designing and creating.
- Tested code for bugs or technical issues and debugging to fix errors.
- Engaged in Agile development practices, including sprint planning and daily stand-ups, to meet project deadlines.
- Utilised Git for version control, maintaining a clear history of project developments and team contributions.
